FLAVANTO 40 TABS

CLARIFIERS

Beer

General features

Flavanto 40 Tabs is a PVPP (*polyvinylpolypyrrolidone*) with an adsorption index of 40%. It appears as a very fine, hygroscopic white powder. Its selective adsorbing action targets simple polyphenols, which are responsible for beer browning and colour instability. The interaction with beer is rapid, allowing very short contact times, especially at temperatures below 10 °C.
Flavanto 40 Tabs offers the following benefits:

- Removal of unstable colour: eliminates browning-related polyphenols, improving visual stability
- Improved colour: contributes to a brighter and clearer beer
- Aroma cleanliness and enhancement: preserves and enhances the beer's aromatic profile
- Foam stability: helps standardise and stabilise foam formation
- Taste improvement: promotes a cleaner and more balanced flavour profile
- Reduced need for antioxidants: improves oxidative stability, decreasing the need for additional additives

Composition

Pure PVPP tablets.

Dosage

80 g/hl (maximum legal limit).

How to use

Use Flavanto 40 in a 1:5 aqueous suspension and allow it to hydrate for approximately 20 minutes.
Let it act in the beer for at least 24–36 hours, then proceed with filtration.
It is recommended to perform preliminary trials on small beer samples.

Packaging and storage

1 kg and 10 kg bag.
Store in a cool, dry place, away from heat sources.
